Adventures in Aeronautics	CA	SCI.3.PS.1.i	Energy and matter have multiple forms and can be changed from one form to another. As a basis for understanding this concept Students know people once thought that earth, wind, fire, and water were the basic elements that made up all matter. Science experiments show that there are more than 100 different types of atoms, which are presented on the periodic table of the elements

Adventures in Aeronautics	CA	SCI.4.IE.6.b	Scientific progress is made by asking meaningful questions and conducting careful investigations. As a basis for understanding this concept and addressing the content in the other three strands, students should develop their own questions and perform investigations. Students will Measure and estimate the weight, length, or volume of objects
